

## Prodiags 5 Pricing

### License alternatives

#### Self-learner

A self-employed student buys a license for course modules from Prodiags online shop or Ebay. The license is for independent study and is valid for 6 months from the date of purchase.

#### Organisational Learning

Organisations are schools or similar organisations where teaching is managed by teachers / trainers and administrators. The organization has its own Prodiags LMS group, which is separate from other organisations. The organisation reserves product-specific user licenses to "stock". When user roles are added to the course (product), then the product license will be "called off" from your "stock" and balance will be reduced accordingly.

The license has a max. validity period, which begins with the moment the product is added to the user. License max. validity period is typically 12 months, but publicly funded educational organisations have the option to apply for a longer license period, for example, a typical duration of the training / education. It should be noted that external content providers using Prodiags 5 as their distribution channel may not commit to extended licensing, though each content provider can set a maximum specific time per product.

**Note! Licenses purchased to stock by an organisation will not expire!**

## Organisational Learning Licenses

### Basic User Licence (BUL)

Basic User License is required for the Prodiags LMS System. This license enables entry to and presence in the group and for all roles and role types. Additionally execution and conversion reports can be run to users. The License fee is € 3. Depending on the amount of commercial use, the organisation will receive a reduction of the Basic User License fee price between 0 ... 100%. Meaning for organisations that use multiple purchased content, the **Prodiags learning environment is free!**

### Course Module User License

Course modules refer to learning materials (modules) such as Electrical and Hybrid Automotive Technology, Common Rail, Identification of Hand Tools, etc., or competence-related products such as Automotive Electrical Safety SFS6002 Final Exam or Automotive Air Conditioner Installer Qualification Test etc.

In Prodiags 5, the cost per course of the course module is based on the pricing of self-study courses in our online store, from which organisational learning customers receive increasing discounts per product depending on the utilization rate. Meaning the price tag for products that are used on a wide scale is getting smaller, however the occasional use of course themes remains still moderate.

### Add-ons / Plug-ins and Extensions

For Prodiags 5, it is possible to obtain add-ons, such as the organisation's own content production or distribution of material. Add-ons and extensions are added to the Basic User License fee.

## Using Prodiags Content in other learning environments

Prodiags 5 course modules can also be used in other learning environments. Pricing for course modules is same like with Prodiags LMS usage.

For the external learning environment a Prodiags Gateway Add-on is necessary. The Gateway license is purchased separately. Our Gateway solutions are built using [LTI Standard](#) enabling learning environments such as Moodle. Possible development costs and one time setup investment will be added.
