

Report of Users

With this function you can see all the users which have a role in the assigned group or team. The teacher can't search for users from other groups or teams. The teacher needs to switch role in order to see reports from other groups or teams.

Searching reports is safe and won't do any changes in the user data. Feel free to try different ways to search user reports.

It's possible to view the reports in Prodiags or they can be exported to a PDF – document or a CSV – table.
